Company Introduction:

Sigma Fasteners India is a leading manufacturer and exporter of Anchor Pre-Stressed and Post-Tensioning Grip Systems, delivering advanced anchoring solutions for modern construction and infrastructure projects of worldwide countries. Post tensioning grip systems are widely used for reinforcing and prestressing concrete, masonry, and structural elements in various engineering applications. Sigma Fasteners India are manufacturers, suppliers and exporters of Anchor Pre-Stressed and Post-Tensioning Grip Systems, including anchor wedges, anchor barrels, anchor heads, anchor coupling systems, and wedges enclosed couplers designed for high-performance construction applications.

Our company manufacture and export anchor heads, anchor wedges, anchor barrels, and coupling systems designed to provide high strength and long-lasting performance in demanding construction environments. Anchor heads are designed to securely hold wedges and ensure proper placement and tensioning of strands within prestressed concrete systems. We manufacture precision-engineered anchor wedges that firmly grip high-strength steel strands, ensuring effective transfer and retention of prestressing forces over time.

Our anchor barrels play a critical role in mono-strand prestressing applications, ensuring secure handling and efficient load transfer during tensioning operations. Anchor systems are essential components in construction, helping transfer load forces such as tension and shear safely into concrete structures. We are the Indian manufacturer and exporter of anchor coupling systems and wedge enclosed couplers that enhance connectivity and performance of prestressing tendons in complex structures.
